

兔抗 CAV2(Phospho-Tyr27) 多克隆抗体

中文名称：兔抗 CAV2(Phospho-Tyr27) 多克隆抗体

英文名称： Anti-CAV2(Phospho-Tyr27) rabbit polyclonal antibody

别名： CAV

相关类别： 一抗

储存： 冷冻（-20℃） 避光

宿主： Rabbit

抗原： CAV2(Phospho-Tyr27)

反应种属： Human

标记物： Unconjugate

克隆类型： Unconjugate

技术规格

Background:

The protein encoded by this gene is a major component of the inner surface of caveolae, small invaginations of the plasma membrane, and is involved in essential cellular functions, including signal transduction, lipid metabolism, cellular growth control and apoptosis. This protein may function as a tumor suppressor. This gene and related family member (CAV1) are located next to each other on chromosome 7, and express colocalizing proteins that form a stable hetero-oligomeric complex. Alternatively spliced transcript variants encoding different isoforms have been identified for this gene. Additional isoforms resulting from the use of alternate in-frame tra

	nslation initiation codons have also been described, and shown to have preferential localization in the cell (PMID:11238462). [provided by RefSeq, May 2011]
Applications:	WB
Name of antibody:	CAV2(Phospho-Tyr27)
Immunogen:	Peptide sequence around phosphorylation site of tyrosine 27 (L-E-Y(p)-A-D) derived from Human Caveolin 2.
Full name:	caveolin 2
Synonyms :	CAV
SwissProt:	P51636
WB Predicted band size:	18 kDa
WB Positive control:	COS7 cells lysates
WB Recommended dilution:	500-1000
