## 技术规格

Background	Antibody Specificity: Based on immunoelectrophoresis and/or ELIS A, the antibody reacts with whole molecule rabbit IgG. It also re acts with the light chains of other rabbit immunoglobulins. No a ntibody was detected against non-immunoglobulin serum protein s. The antibody exhibits inherent minimal cross-reaction to mous e serum proteins and has been tested by ELISA and/or solid-pha se adsorbed to ensure minimal cross-reaction with human, goat, mouse, and sheep serum proteins. The antibody may cross-react with immunoglobuling from other species
Applications	with immunoglobulins from other species. 1/50-200 for most application
